

2 December, 1971

Dr. W. G. Schneider,
President,
National Research Council of Canada,
Ottawa.

Dear Bill:

The telegram that you sent to me in Moscow on behalf of the Council was the first firm indication that I had that the Nobel Prize to me was in Chemistry. I did very much appreciate the kind remarks that you addressed to me and I would ask you to transmit to Council my most sincere thanks for their share in this message.

As ever,

G. Herzberg
